

# ARTIFICIAL INTELLIGENCE & (ARTIFICIAL) ATTACHMENT

Attachment is co-created

Attunement

Shared pleasure

Mirroring

Mentalizing

Facial expression, posture, tone of the voice, physiological changes, tempo of movement, etc.

Co-constructed adaptiveness

Reflective functioning

Regulation

Instinctive and spontaneous socio-emotional adaptiveness

Reciprocity and synchronicity to each other's cues

Bowlby (1969) and Ainsworth's (1978) seminal work on attachment  
Mutual reciprocal feedback system (Brazelton, 2000)

Psychobiological transactional dyad

Mutually co-ordinated and synchronized socio-emotional 'dance' between infant and mother

Unconscious emotional states & shifting of arousal states
